

Faiz Muhammad

Senior .NET Developer | ASP.NET Core · Clean Architecture · Payment Systems · Government Digital Transformation

faizmuhammadmarri@gmail.com | +92 303 2213801 | [Linkedin.com/in/faiz-mari](#) | Karachi, Pakistan (Open to GCC ReLocation)

PROFESSIONAL SUMMARY

Senior .NET Developer with 5+ years of full-stack experience designing and delivering enterprise-grade ASP.NET Core applications across FinTech, banking, and UAE government sectors. Proven track record integrating complex payment systems (Ngenius, UAE Pay, Stripe, Naqodi) and modernising legacy platforms for UAE Ministry of Energy & Infrastructure. Reduced a critical banking service processing time by 96% (4 hours → 10 minutes) at HBL. Experienced in Clean Architecture, CQRS, Repository Pattern, JWT/OAuth 2.0, Redis, SignalR, Hangfire, and CI/CD pipelines with Azure DevOps. Currently expanding expertise in Azure cloud services, MediatR, Docker, and Kubernetes.

TECHNICAL SKILLS

Backend	C#, .NET Core 3.1–9, ASP.NET Core MVC, Web API, Entity Framework Core, LINQ, ADO.NET
Architecture	Clean Architecture, CQRS, MediatR, Repository Pattern, SOLID, DDD, Microservices, RESTful API Design
Auth & Security	JWT Authentication, ASP.NET Core Identity, OAuth 2.0, Role-Based Access Control
Cloud & DevOps	Azure (App Service, DevOps, Functions — learning), Docker (learning), Kubernetes (learning), CI/CD Pipelines, Git, Bitbucket, Azure DevOps
Data & Caching	SQL Server, Oracle, T-SQL, Entity Framework Migrations, Redis (distributed caching), SSRS, SSIS
Messaging & Jobs	Hangfire (background jobs), SignalR (real-time), SendGrid (transactional email)
Payment	Ngenius, UAE Pay, Stripe, Naqodi — payment gateway integration, PCI-compliant transaction flows
Frontend	Angular 14+, Blazor, HTML5, CSS3, Bootstrap, JavaScript, jQuery
Testing & Tools	Unit Testing, Postman, Swagger/OpenAPI, JIRA, Agile/Scrum, Azure DevOps CI/CD

PROFESSIONAL EXPERIENCE

Senior .NET Developer — Payment Integrations & Legacy Modernization

Smart Works for Information Systems.

Abu Dhabi, UAE · May 2025 – May 2026

- Integrated 4 payment gateways (Ngenius, UAE Pay, Stripe, Naqodi) into a legacy VB.NET ticket sales system for SZF (Sharjah National Events), processing high-volume transactions with enhanced PCI-compliant security flows.
- Modernised 3 core MOEI (UAE Ministry of Energy & Infrastructure) legacy services to ASP.NET Core 8, achieving a 40% reduction in maintenance overhead and improving system reliability for a critical government platform.
- Designed and deployed a configurable ASP.NET Core Middleware API with unified endpoint architecture, leveraging DB-stored configurations to execute stored procedures dynamically — enabling scalable, JSON-centric data processing pipelines without code redeployment.
- Developed a full Sports Lottery System for SZF events covering participant registration, voting engine, admin tally, winner selection, and prize distribution workflows.
- Implemented SendGrid transactional email integration for automated payment confirmations and compliance notifications, reducing manual outreach by an estimated 80%.
- Developed a Jira-inspired Smart Help Desk System using ASP.NET Core MVC, C#, SQL Server, Entity Framework Core, and SignalR, supporting ticket management, project tracking, sprint workflows, user management, dashboards, and enterprise RBAC.

.NET Developer — Government Digital Transformation

HNW Research and Management Consultancy.

Abu Dhabi, UAE · Oct 2024 – May 2025

- Architected and delivered a digital CX Improvement Hub serving 12 Abu Dhabi government entities, enabling tracking of 200+ KPIs and automated multi-step approval workflows using ASP.NET Core, Entity Framework, and Clean Architecture principles
- Built real-time project progress dashboards with Gantt chart visualisations for government programme managers, improving cross-entity project visibility
- Designed and implemented a digital services catalogue with role-based access and configurable service templates, streamlining public sector service onboarding

.NET Developer — HRMS & Biometric Systems

NexGen Technologies LLC.

Dubai, UAE · May 2024 – Sep 2024

- Reduced average API response time by 35% across Time & Attendance, HRMS, and Visitor Management systems by profiling bottlenecks and implementing targeted optimisations — directly improving experience for 500+ daily users
- Developed an Emirates ID card reader integration into the visitor management system, cutting check-in processing time and improving gate security compliance
- Implemented a QR code badge printing system for visitor management, eliminating manual badge creation and reducing gate access delays

Mid-Level Software Engineer — Banking & FinTech

(HBL bank) HBL Innovation Center.

Pakistan · Oct 2022 – Oct 2023

- **96% performance improvement:** Re-architected the blacklist screening service from a sequential scan to an optimised indexed query strategy, reducing processing time from 4+ hours to 10 minutes — directly unblocking merchant onboarding SLAs
- Designed and implemented standardised digital onboarding workflows for 5 HBL merchant payment products (POS, QR, Direct Transfer, IPG, Konnect Agent), reducing manual onboarding effort by ~60%
- Replaced third-party PaySky mPOS system with an in-house ASP.NET Core solution for IPG merchants, reducing licensing cost and enabling custom payment flow control
- Integrated liveness facial recognition API for KYC/AML compliance in the digital onboarding pipeline

Software Engineer .NET

KCompute (Private) Ltd.

Pakistan · Sep 2021 – Sep 2022

- resolution, feature delivery, and performance improvements across a legacy .NET product serving US insurance brokers
- Developed automated low-rating feedback notification system for the SurView.AE platform, triggering real-time email alerts to clients and platform owners on negative survey responses

EDUCATION

Bachelor of Computer Science

University of Sindh, Jamshoro · Graduated December 2021

CURRENTLY LEARNING

Microsoft Dynamics 365 CRM · Docker & Kubernetes · Blazor Server/WASM
